---

Computer Science student with a keen interest in web development.

## Experience

---

### Mersate, Frontend Intern

Jan 2025- May 2025

- Worked as a Frontend Intern at Mersate, where I developed and implemented responsive web pages to enhance the platform's design and user experience.
- Collaborated with the team to ensure smooth integration of UI components with backend services and contributed to optimizing the overall look, feel, and performance of the website.

### Ecorp Infosystems, Full Stack Intern

Jul 2025- Oct 2025

- Worked as a Full Stack Web Developer Intern at Ecorp Infosystems, where I contributed to developing and deploying production-level web applications, including a hotel management system and other client-focused platforms.
- My responsibilities included building scalable features, integrating secure payment gateways with Stripe, and working with PostgreSQL for efficient data management

## Skills

---

**Programming** Python, Java (DSA), C/C++, Javascript

**Techniques** React.js , Next.js , Tailwind CSS , Node.js

**Database** Postgres SQL, MongoDB, SQL

## Education

---

### B. Tech in Computer Science - 8.5 CGPA

Guru Gobind Singh Indraprastha University

Jul 2026

Delhi, India

### (10 + 2) CBSE Board - 88%

Apeejay School Pansheel Park

Jul 2022

Delhi, India

## Projects

---

**DRAPELY.ai**: Next.js, Clerk, Postgres SQL, Stripe, Typescript, Python, Tailwind CSS,

- **Built** an end-to-end virtual try-on prototype combining computer vision and web UI to let users preview apparel on uploaded photos.
- **Implemented** using Next.js and TypeScript, the app delivers secure user authentication, real-time cache revalidation with redis.

**Haven-Hotel Booking**: Next.js, Clerk, Stripe, Nodemailer, Typescript, Tailwind CSS, MongoDB

- **Designed** an end-to-end hotel booking web application featuring destination search, date selection, guest management, and booking flow.
- **Integrated** secure payment processing and booking confirmation flows for a production-like reservation experience.

**Anonymous Feedback**: Next.js, Typescript, NextAuth, Tailwind CSS, MongoDB

- **Developed** a full-stack web application for collecting and managing anonymous feedback.
- **Implemented** secure authentication, a scalable database design, and RESTful APIs for feedback submission and retrieval and AI based suggestions by implementing Groq model gpt-oss-20B
